There are things the people of Winter, Wisconsin, would rather forget. The year the Nazis came to town, for one. That fire, for another. But what they'd really like to forget is Christian Cage. Seventeen-year-old Christian's parents disappeared when he was a little boy. Ever since, he's drawn obsessively: his mother's face...her eyes...and what he calls "the sideways place," where he says his parents are trapped. Christian figures if he can just see through his mother's eyes, maybe he can get there somehow and save them. But Christian also draws other things. Ugly things. Evil things. Dark things. Things like other people's fears and nightmares. Their pasts. Their destiny. There's one more thing the people of Winter would like to forget: murder. But Winter won't be able to forget the truth, no matter how hard it tries. Not as long as Christian draws the dark...

To read of sea roving's various incarnations - piracy, privateering, buccaneering, la flibuste, la course - is to bring forth romantic, and often violent, imagery. Indeed, much of this imagery has become a literary and cinematic cliché. And what an image it is! But its truth is by halves, and paradoxically it is the picaresque imagery of Pyle, Wyeth, Sabatini, and Hollywood that is often closer to the reality, while the historical details of arms, tactics, and language are often inaccurate or entirely anachronistic. Successful sea rovers were careful practitioners of a complex profession that sought wealth by stratagem and force of arms. Drawn from the European tradition, yet of various races and nationalities, they raided both ship and town throughout much of the world from roughly 1630 until 1730. Using a variety of innovative tactics and often armed with little more than musket and grenade, many of these self-described "soldiers and privateers" successfully assaulted fortifications, attacked shipping from small craft, crossed the mountains and jungles of Panama, and even circumnavigated the globe. Successful sea rovers were often

supreme seamen, soldiers, and above all, tacticians. It can be argued that their influence on certain naval tactics is felt even today. The Sea Rover's Practice is the only book that describes in exceptional detail the tactics of sea rovers of the period - how they actually sought out and attacked vessels and towns. Accessible to both the general and the more scholarly reader, it will appeal not only to those with an interest in piracy and in maritime, naval, and military history, but also to mariners in general, tall-ship and ship-modeling enthusiasts, tacticians and military analysts, readers of historical fiction, writers, and the adventurer in all of us.

These conference proceedings focus on "Assessment for Learning: Within and Beyond the Classroom" in recognition of the power of assessment for learning as a way of boosting student performance. They explore the breadth, depth and quality of the best models and practices, strategies, lessons learnt and discuss cases of successful implementation of assessment within the classroom and beyond, including the virtual space. They also provide fertile ground for stimulating and comparing responsive assessment approaches and practices in relatively new areas of assessment such as graduate capability assessment in view of the need for educational institutions to evidence graduate employability.

The World Is No Longer Flat Culo is an art, fashion, and pop-culture movement that defies all national, cultural, and linguistic boundaries. No matter if you were raised to call it derriere, tush, rear end, or booty, culo is the new epicenter of female sexuality, desire, and empowerment. Over the past decade, some of the world's most celebrated women have subtly shifted our long-held ideals of physical perfection toward a shape that is more authentic and bold. While culo has long been venerated in certain cultures, it is now becoming the object of worldwide mainstream admiration. This emerging global love affair with culo is as much about the blending of African, Latin, European, and Asian beauty as it is about celebrating the female form's most coveted asset. Culo by Mazzucco pays tribute to this phenomenon through a singular artistic vision. In more than 200 photographs and artworks created on location around the world, a diverse group of women—some already legendary, some about to become so—embody the spirit of culo and the start of a new era of beauty.

Conventional wisdom says the universe is infinite. But could it be finite, merely giving the illusion of infinity? Modern science is beginning to drag this abstract issue into the realm of the real, the tangible and the observable. HOW THE UNIVERSE GOT ITS SPOTS looks at how science is coming up sharp against the mind-boggling idea that the universe may be finite. Through a decade of observation and thought-experiment, we have started to chart out the universe in which we live, just as we have mapped the oceans and continents of our planet. Through a kind of cosmic archaeology and without leaving Earth, we can look at the pattern of hot spots left over from the big bang and begin to trace the 'shape of space'. Beautifully written in a colloquial style by a world authority, Janna Levin explores our aspirations to observe our universe and contemplate our deep connection with it.
