Since the Analysis ToolPak does machine learning with regression and other complex data analysis, I assume Microsoft sees Excel as one of their platforms for Advanced Analytics. Anyhow, the ToolPak feels a bit old-school, as using hard-coded functions in SAS or SPSS. Modern data science is about open libraries and transparency.

Azure Analysis Services uses Azure Active Directory (Azure AD) for identity management and user authentication. Any user creating, managing, or connecting to an Azure Analysis Services server must have a valid user identity in an Azure AD tenant in the same subscription. Azure Analysis Services supports Azure AD B2B collaboration. With B2B, users from outside an organization can be invited as guest users in an Azure AD directory.
