4.2 Comparison leadership styles. Greenberg and Baron, (2000, pp 180-184) described three types of leadership including “authoritarian, democratic, and Laissez-faire.” ASB managers have not strong authoritarian styles that they do not control tightly and tell the staff everything.

From taxi rides, hotel stays, car driving, to communicating and paying, everything we knew as normal has changed beyond recognition. To lead effectively in today’s brave new world, you have to question EVERYTHING. For the first time in human history, knowledge is free and almost every boundary to communication has been lifted. This open source world has permanently altered the business landscape. And you can count on the fact that the pace of change will only accelerate. Yet... companies still rely on management tools and practices that were, at best, mildly effective in their heyday. In Open Source Leadership, Rajeev Peshawaria

reveals the vision, insight, and practices he has used to help some of today's largest and most influential organizations meet the open source world head on. It all starts with asking the right questions: What's the most effective leadership style in a world of 24/7 connectivity? How has the very concept of leadership changed in the open source era? How do you inspire and reward performance in the "gig economy?" How do you measure engagement and effectively address the gaps? How can you lead innovation--quickly and continuously? Peshawaria reveals the answers to these questions--and they will surprise you. Based on his company's groundbreaking research spanning 28 countries, he concludes that traditional industrial age thinking needs a massive upgrade to successfully navigating the brave new world of business. Open Source Leadership rewrites the rules of management, giving you a unique look at the most common misperceptions, illusions, and downright wrong information you've been getting about what works and what doesn't. It provides a new, counterintuitive model for seizing competitive edge in any industry. Among other issues the book argues convincingly that "positive autocracy" must replace democratic leadership; talent and innovation are abundant not scarce; early identification of high-potentials is counter-productive; and setting employees free to do as little as they want will increase productivity.

Grasping the Heel of Heaven honours the immense legacy to the church of Michael Perham. A skilled and imaginative liturgist, a passionate advocate of women's ministry, an inspirational dean and bishop, a wise and patient administrator, he was above all a faithful priest who loved the Church as the body of Christ. In all his ministry he sought to nourish that body by encouraging its worship and prayer and shaping its governance in the light of gospel ideals. In this volume, friends and colleagues bring their own expertise to reflect on some of the topics and themes that were most important to him, including: • Being transported and transformed by liturgy • The making of Common Worship • The full inclusion of the ministry of women • How structures and decision-making express an understanding of God • Unity despite differences in and through God • The gospel as good news for all Together, the contributors reflect the numerous ways that Michael Perham saw heaven touching earth and earth glimpsing heaven.

The untold story of how America once created the most successful economy the world has ever seen and how we can do it again. The American economy glitters on the outside, but the reality is quite different. Job opportunities and economic growth are increasingly concentrated in a few crowded coastal enclaves. Corporations and investors are disproportionately developing technologies that benefit the wealthiest Americans in the most prosperous areas--and destroying middle class jobs elsewhere. To turn this tide, we must look to a brilliant and all-but-forgotten American success story and embark on a plan that will create the industries of the future--and the jobs that go with them. Beginning in 1940, massive public investment generated breakthroughs in science and technology that first helped win WWII and then created the most successful economy the world has ever seen. Private enterprise then built on these breakthroughs to create new industries--such as radar, jet engines, digital computers, mobile telecommunications, life-saving medicines, and the internet-- that became the catalyst for broader economic growth that generated millions of good jobs. We lifted almost all boats, not just the yachts. Jonathan Gruber and Simon Johnson tell the story of this first American growth engine and provide the blueprint for a second. It's a visionary, pragmatic,

sure-to-be controversial plan that will lead to job growth and a new American economy in places now left behind.
