Modules of one to four weeks present fundamental chemistry to students in the context of a real-world problem or application and emphasize the links between chemistry and other disciplines. Curriculum materials, including text, lab, and multimedia components suitable for students from diverse cultural and ethnic backgrounds and usable at a wide variety of undergraduate institutions, were produced.

Welcome to ChemConnections

This chapter reveals the chemistry fundamentals that are instrumental in phases and phase transitions between different states of matter. The issues dealt with in this chapter are—the process of cloud seeding, the chemical principles that growers apply to protect their crops, reasoning behind the dark spot on the inside of a burned-out light bulb, the red or silver liquids in thermometers, and so on.
