So, you've finally, done it: You've entered the realm of stoichiometry. Or as some people pronounce it, "stoi-shee-oh-met-tree." Don't pronounce it that way, it'll make you sound silly. The actual pronunciation: "stoy-key-ah-meh-tree." Now that we've got that out of the way, let's learn about the magical world of stoichiometry! The magical world of stoichiometry In...

Stoichiometry Lab In class, you've learned to compute how much of a chemical product you can make when you mix measured amounts of chemical reactants. In this lab, you will be actually using this information to predict how much product will be made; you will then calculate the percent yield gained from the amount that you actually recover.

Students learn how common pop culture references (Harry Potter books) can relate to chemistry. While making and demonstrating their own low-intensity sparklers (muggle-versions of magic wands), students learn and come to appreciate the chemistry involved (reaction rates, Gibb's free energy, process chemistry and metallurgy). This lab serves as a fun, engaging review for stoichiometry ...

The first unit in my sequence for AP Chemistry covers stoichiometry and reactions. The new AP Chemistry Course and Exam Description has identified Learning Objectives which need to be taught and practiced to ensure students perform well on the AP Chemistry Exam. I will identify and describe activities I use to teach students some of the Learning Objectives that I tie into this unit.

The study of the chemical behavior of gases was part of the basis of perhaps the most fundamental chemical revolution in history. French nobleman Antoine Lavoisier, widely regarded as the "father of modern chemistry," changed chemistry from a qualitative to a quantitative science through his work with gases.
