The chemicals sub-sector of industry in India as a whole (including pharmaceuticals) accounts for about 13% of the total output of the manufacturing sector, 13 to 14% in total exports and 8

Where To Download Detailed Project Profiles On

to 9% in total imports of the country. The sector contributes about 3% to the GDP. It also contributes 18 to 20% to the exchequer by way of taxes. The size of the sub-sector is estimated at around USD 35 bn

Where To Download Detailed Project Profiles On

(approximately Rs 1575 bn) .

The basic chemicals make up for nearly 57% of the sub-

sector, followed by about 26% of specialty chemicals.

The rest is made up of high-end chemicals or what are now termed as knowledge

Where To Download Detailed Project Profiles On

segment. Against an overall installed capacity of around 10 mn tonnes, India produces nearly 8 mn tonne, of an assortment of chemicals.

These exclude petrochemicals, but include chlor-alkalis, and dyes and

Where To Download Detailed Project Profiles On

dyestuffs. The chemicals industry is a highly versatile segment in the overall industrial economy of India. It has linkages with almost every other industrial activity, be it food processing, metallurgy,

Where To Download Detailed Project Profiles On

Selected Chemical
Industries 2nd Edition
textiles, rubber or leather.

There is, in fact, hardly any segment where chemicals do not feature. The industry is broadly segmented into four major categories: Chlor-alkali and inorganic chemicals: caustic soda,

Where To Download Detailed Project Profiles On

soda ash, sulphuric acid,
titanium dioxide, carbon
black, calcium carbide,
aluminium fluoride and
others; Organic including
alcohol-based chemicals:
ethyl glycol, phenols,
acetic acid, acetic

Where To Download Detailed Project Profiles On

anhydride, vinyl acetate,
monomers, ethylene
dichloride, ethylacetate and
others; Petrochemicals-based
specialities: leather and
textile auxiliaries,
synthetic resins, rubber
chemicals, especially for

Where To Download Detailed Project Profiles On

tyres; and Agro-oriented chemicals: guar gum, starch, citric acid, sorbitol, yeast and others. Petrochemicals, pharmaceuticals, synthetic fibres, fertilisers and pesticides, paints and dye-stuffs constitute over 85%

Where To Download Detailed Project Profiles On

of the market. The remaining 15% represents a wide range of chemical intermediates and industrial or speciality chemicals which have a market of over Rs 240 bn (including imports of about Rs 35 bn). Against the

Where To Download Detailed Project Profiles On

growth dynamics of the chemical industry as a whole, the industrial chemicals segment covering intermediates and speciality chemicals witnessed a somewhat sluggish growth in recent years. Thereafter

Where To Download Detailed Project Profiles On

some upward trend was in evidence as a consequence of a rally in user industries like rubber, leather, food processing, textiles especially man-made fibres and fabrics.

Downstream industries like

Where To Download Detailed Project Profiles On

chlorinated benzenes,
cosmetics and pesticides
also registered positive
trends. The industry has
remained among the fastest
growing sectors of the
economy. The chemical
industry remains

Where To Download Detailed Project Profiles On

concentrated in the western region, which claims a near 50% share of investment flows. In the western region, Gujarat makes the largest contribution to the chemical industry's production activity. This

Where To Download Detailed Project Profiles On

Milk is one of the essential

Where To Download Detailed Project Profiles On

Selected items of daily life in our country and it is more so as a majority of Indians are vegetarian and thus milk and milk products are indispensable necessity.

Indian dairying is emerging as a sunrise industry. India

Where To Download Detailed Project Profiles On

represents one of the largest and fastest growing milk & milk products globally. The dairy industry plays an important role in our daily life. It is difficult to realize how fast changes are taking

Where To Download Detailed Project Profiles On

place in the dairy industry. Milk is an important human food, it is palatable, easy to digest and highly nutritive. There are numerous types of milk products such as ghee, butter, cheese, yogurt, ice

Where To Download Detailed Project Profiles On

cream and so on. Each of these has been designed to take advantage of some particular property of milk. Dairy products are generally defined as food produced from the milk of mammals; they are usually high energy

Where To Download Detailed Project Profiles On

yielding food products.

Cheese is the product made from the curd obtained from whole or skimmed milk, with or without added cream, by coagulating the casein and further treatment, of the separated curd by ripening

Where To Download Detailed Project Profiles On

ferments, special molds or seasoning. Cheese has not been the popular item of food in India mainly because animal rennet is used in the preparation. Enzymes play an important role in the production of cheese. Raw

Where To Download Detailed Project Profiles On

milk contains several native enzymes some of which can be used for analytical and quality purposes for example pasteurization can be assessed by determining indigenous alkaline phosphate activity. India is

Where To Download Detailed Project Profiles On

known as the Oyster of the global dairy industry, with opportunities galore to the entrepreneurs globally.

Anyone might want to capitalize on the largest and fastest growing milk and milk products market. The

Where To Download Detailed Project Profiles On

dairy industry in India has been witnessing rapid growth. The main aim of the Indian dairy industry is only to better manage the national resources to enhance milk production. This book is an invaluable

Where To Download Detailed Project Profiles On

Selected Chemical

alongwith project profiles
and addresses of raw
material, plant and
machinery suppliers.

Plastic is a polymeric
material that has the
capability of being molded

Where To Download Detailed Project Profiles On

or shaped, usually by the application of heat and pressure. This property of plasticity, often found in combination with other special properties such as low density, low electrical conductivity, transparency,

Where To Download Detailed Project Profiles On

and toughness, allows plastics to be made into a great variety of products. Many of the chemical names of the polymers employed as plastics have become familiar to consumers, although some are better

Where To Download Detailed Project Profiles On

known by their abbreviations or trade names. Thus, polyethylene terephthalate and polyvinyl chloride are commonly referred to as PET and PVC, while foamed polystyrene and polymethyl methacrylate are known by

Where To Download Detailed Project Profiles On

their trademarked names, Styrofoam and Plexiglas (or Perspex). The plastic consumption will increase to 20 million tonnes a year in 2020 from the current 8 million tonnes a year in India. Plastics is one of

Where To Download Detailed Project Profiles On

the biggest contributor to India's GDP with the growth rate of 12%-15% per annum, it houses over 50,000 manufacturers and employees of over 40 lakh workers in the plastics industry. Polymers are chemical

Where To Download Detailed Project Profiles On

9 Selected Chemical
Industries 2nd Edition

compounds whose molecules are very large, often resembling long chains made up of a seemingly endless series of interconnected links. The size of these molecules, as is explained in chemistry of industrial

Where To Download Detailed Project Profiles On

polymers, is extraordinary,
ranging in the thousands and
even millions of atomic mass
units. Polymers have found
uses in all spheres of life
with demand for better
materials, greater
functional utility, more

Where To Download Detailed Project Profiles On

economical packaging and versatile and durable all-weather products. The per capita consumption of polymers in India is around 5.5 kg. The Government of India has prepared an ambitious plan to achieve a

Where To Download Detailed Project Profiles On

ten-fold increase in plastic exports (from \$ 25 mn to 250 mn) to the US. Polyethylene terephthalate is a thermoplastic polymer resin of the polyester family and is used in synthetic fibers; beverage, food and other

Where To Download Detailed Project Profiles On

liquid containers;
thermoforming applications;
and engineering resins often
in combination with glass
fiber. PET in its natural
state is a colorless, semi-
crystalline resin. Based on
how it is processed, PET can

Where To Download Detailed Project Profiles On

be semi-rigid to rigid, and it is very lightweight. It makes a good gas and fair moisture barrier, as well as a good barrier to alcohol and solvents. Poly (vinyl chloride), is the third-most widely produced polymer,

Where To Download Detailed Project Profiles On

after polyethylene and polypropylene. PVC comes in two basic forms: rigid (sometimes abbreviated as RPVC) and flexible. The rigid form of PVC is used in construction for pipe and in profile applications such as

Where To Download Detailed Project Profiles On

doors and windows. It is also used for bottles, other non-food packaging, and cards (such as bank or membership cards). It can be made softer and more flexible by the addition of plasticizers, the most

Where To Download Detailed Project Profiles On

widely used being
phthalates. Around 1.1
Million Metric Tons, out of
which, Polyvinyl chloride
(PVC) accounts for 0.36
Million Metric Tons,
Polypropylene (PP) 0.27
Million Metric Tons and

Where To Download Detailed Project Profiles On

Polyethylene (PE) 0.46
Million Metric Tons. The
quantum of imports increased
further to 1.8 MMT with
imports of Polyvinyl
chloride (PVC),
Polypropylene (PP) and
Polyethylene (PE) rising to

Where To Download Detailed Project Profiles On

0.70, 0.43 and 0.62 MMT.

Replicating the growth in gross domestic product, polymer demand in India grew from 3.459 Million Metric ton per annum (MMtpa) in 2000 to 9.013 MMtpa in 2011 at a Compound Annual Growth

Where To Download Detailed Project Profiles On

Rate (CAGR) of 9.1%. Strong growth in the packaging sectors will drive the demand further to 14.315 MMtpa in 2016. To meet this growing demand, India increased its polymer production from 3.568 MMtpa

Where To Download Detailed Project Profiles On

in 2000 to 7.377 MMtpa in 2016. With an increase in demand the polymer

consumption is expected to double by 2020, to about 20 million metric tons.

Disposable is the ability of something to be disposed of

Where To Download Detailed Project Profiles On

or thrown away after use. A disposable (also called disposable product) is a product designed for a single use after which it is recycled or is disposed as solid waste. The term often implies cheapness and short-

Where To Download Detailed Project Profiles On

term convenience rather than medium to long-term durability. Polystyrene is a synthetic aromatic polymer made from the monomer styrene. Polystyrene can be solid or foamed. General purpose polystyrene is

Where To Download Detailed Project Profiles On

clear, hard, and rather brittle. It is an inexpensive resin per unit weight. It is a rather poor barrier to oxygen and water vapor and has a relatively low melting point.

Polystyrene is one of the

Where To Download Detailed Project Profiles On

most widely used plastics, the scale of its production being several billion kilograms per year. India is growing at an average annual rate of 7.6% for the past five years and it is expected to continue growing

Where To Download Detailed Project Profiles On

at an equal if not faster rate. The rapid economic growth is increasing and enhancing employment and business opportunities and in turn increasing disposable incomes. As households with disposable

Where To Download Detailed Project Profiles On

incomes from Rs 200,000 to 1,000,000 a year comprises about 50 million people, roughly 5% of the population at present. By 2025 the size of middle class will increase to about 583 million people, or 41% of

Where To Download Detailed Project Profiles On

the population. The size of the Indian medical device industry will jump to INR 761 billion by 2017 registering a CAGR of 20% during 2012-17. The content of the book includes information about plastic.

Where To Download Detailed Project Profiles On

The chemical industry is

Where To Download Detailed Project Profiles On

among the most diversified industrial sectors, including a wide variety of products, from basic chemicals to research driven specialised products, at different levels across the industry supply chain. The

Where To Download Detailed Project Profiles On

fundamental nature and diversity of the industry is best understood from the fact that the industry itself is the largest consumer of its products, accounting for around 33% of total consumption. The

Where To Download Detailed Project Profiles On

Selected Chemical
Industries 2nd Edition

industry has a weight of 14% in the Index of Industrial Production, giving an indication of the importance the sector holds in Indian industrial growth. A robust chemical industry is a harbinger of significant

Where To Download Detailed Project Profiles On

economic and strategic
benefits to the nation. The
chemical industry comprises
the companies that produce
industrial chemicals.
Central to the modern world
economy, it converts raw
materials (oil, natural gas,

Where To Download Detailed Project Profiles On

air, water, metals, and minerals) into several different products. The Indian chemical industry is the sixth largest in the world. It accounts for nearly one eighth of industrial production of the

Where To Download Detailed Project Profiles On

country. It also accounts for one sixth of Indian exports of manufactured goods and has been registering a steady growth of about 7 to 8 percent over the past few years. This book provides detailed
