Accompanys: 9780393934281 .

Doing Ethics in Media: Theories and Practical Applications is an accessible, comprehensive introduction to media ethics. Its theoretical framework and grounded discussions engage students to think clearly and systematically about dilemmas in the rapidly changing media environment. The 13-chapter text is organized around six decision-making questions- the "5Ws and H" of media ethics. The questions encourage students to articulate the issues; apply codes, policies or laws; consider the needs of stakeholders; sift and sort through conflicting values; integrate philosophic principles; and pose a "test of publicity." Specifically, the questions ask: • What's your problem? • Why not follow the rules? • Who wins, who loses? • What's it worth? • Who's whispering in your ear? • How's your decision going to look? As they progress through the text, students are encouraged to resolve dozens of practical applications and increasingly complex case studies relating to journalism, new media, advertising, public relations, and entertainment. Other distinctive features include: • Comprehensive materials on classic moral theory and current issues such as truth telling and deception, values, persuasion and propaganda, privacy, diversity, and loyalty. • A user-friendly approach that challenges students to think for themselves rather than imposing answers on them. • Consistent connections between theories and the decision-making challenges posed in the practical applications and case studies. • A companion website with online resources for students, including additional readings and chapter overviews, as well as instructor materials with a test bank, instructor's manual, sample syllabi and more. www.routledge.com/textbooks/black • A second website with continuously updated examples, case studies, and student writing - www.doingmediaethics.com. Doing Ethics in Media is aimed at undergraduates and graduate students studying media ethics in mass media, journalism, and media studies. It also serves students in rhetoric, popular culture, communication studies, and interdisciplinary social sciences.

Doing Environmental Ethics faces our ecological crisis by drawing on environmental science, economic theory, international law, and religious teachings, as well as philosophical arguments. It engages students in constructing ethical presumptions based on arguments for duty, character, relationships, and rights, and then tests these moral presumptions by predicting the likely consequences of acting on them. Students apply what they learn to policy issues discussed in the final part of the book: sustainable consumption, environmental policy, clean air and water, agriculture, managing public lands, urban ecology, and climate change. Questions after each chapter and a worksheet aid readers in deciding how to live more responsibly. The second edition has been updated to reflect the latest developments in environmental ethics, including sustainable practices of corporations, environmental NGO actions, and rainforest certification programs. This edition also gives greater emphasis to environmental justice, Rawls, and ecofeminism. Revised study questions concern application and analysis, and new 'Decisions' inserts invite students to analyze evaluate current environmental issues.

For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

The fifth edition of Nursing Ethics has been revised to reflect the most current issues in healthcare ethics including new cases, laws, and policies. The text continues to be divided into three sections: Foundational Theories, Concepts and Professional Issues; Moving Into Ethics Across the Lifespan; and Ethics Related to Special Issues focused on specific populations and nursing roles.

It is not only in our dark hours that scepticism, relativism, hypocrisy, and nihilism dog ethics. Whether it is a matter of giving to charity, or sticking to duty, or insisting on our rights, we can be confused, or be paralysed by the fear that our principles are groundless. Many are afraid that in a Godless world science has unmasked us as creatures fated by our genes to be selfish and tribalistic, or competitive and aggressive. Simon Blackburn, author of the best-selling Think, structures this short introduction around these and other threats to ethics. Confronting seven different objections to our self-image as moral, well-behaved creatures, he charts a course through the philosophical quicksands that often engulf us. Then, turning to problems of life and death, he shows how we should think about the meaning of life, and how we should mistrust the sound-bite sized absolutes that often dominate moral debates. Finally he offers a critical tour of the ways the philosophical tradition has tried to provide foundations for ethics, from Plato and Aristotle through to contemporary debates.
