The names for built-in Kibana action types are prefixed with a . and include: .server-log, .slack, .email, .index, .pagerduty, and .webhook. An empty list [] will disable all action types. Disabled action types will not appear as an option when creating new connectors, but existing connectors and actions of that type will remain in Kibana and will not function.

Alerting and action settings in Kibana | Kibana Guide [7 ...

Elasticsearch will seek to manage thread pools to achieve the best performance on a given node. In some cases, you'll need to manually configure and override how thread pools are managed to avoid cascading failure scenarios. Under a heavy load, Elasticsearch may spawn thousands of threads to handle requests, causing your cluster to fail.
