Paid \$220 for the both in June this year 2020

Electrotechnology Practice is a practical text that accompanies Hampson/Hanssen 's theoretical Electrical Trade Principles. It covers essential units of competencies in the two key qualifications in the UEE Electrotechnology Training Package: - Certificate II in Electrotechnology (Career Start) - Certificate III in Electrotechnology Electrician Aligned with the latest Australian and New Zealand standards, the text references the Wiring Rules (AS/NZS 3000:2018) and follows the uniform structure and system of delivery as recommended by the nationally accredited vocational education and training authorities. More than 1000 illustrations convey to the learner various concepts and real-world aspects of electrical practices, a range of fully worked examples and review questions support student learning, while assessment-style worksheets support the volume of assessment. Electrotechnology Practice has strong coverage of the electives for Cert II and Cert III, preparing students to eligibly sit for the Capstone Assessment or the Licenced Electrician 's Assessment (LEA). as a mandatory requirement to earn an Electrician 's Licence. Premium online teaching and learning tools are available on the MindTap platform.

Summary: "A comprehensive, practical text providing readers with the fundamental skills and basic knowledge for the electrical trades."--Provided by publisher.

ELECTRICAL TRADE PRINCIPLES: A PRACTICAL APPROACH is a comprehensive, practical text

providing learners with the fundamental skills and basic knowledge for the electrical trades. This self-paced text is ideal for various modes of delivery, including the classroom, workplace or student self-study. Students using this text will also benefit from a Companion Website that allows them to quickly test their knowledge with practice questions including: Multiple-choice, True/False, Fill-in-the-blanks and more.

Supports learning and delivery in: - UEE30811 Certificate III in Electrotechnology Electrician - UEE22011 Certificate II in Electrotechnology (Career Start) Phillips, Electrical Principles uses a student-friendly writing style, a range of fully worked examples and full-colour illustrations to make the basic principles easier to understand. Covering the core knowledge components of the current UEE11 Electrotechnology Training Package and referencing the new AS/NZS 3000:2018 Wiring Rules, this textbook is structured, written and illustrated to present the information in a way that is accessible to students. With a new focus on sustainable energy, brushless DC motors and the inclusion of student ancillaries, as well as structuring more closely to the knowledge and skills requirements for each competency unit covered, Electrical Principles, 4e is the ideal text for students enrolled in Certificate II and III Electrotechnology qualifications. With more than 800 diagrams, hundreds of worked examples, practice questions and self-check questions, this edition is the most up-to-date text in the market. The writing style is aimed at Certificate III students while retaining the terminology typically used in the Electrical Trades. Additionally, the technical content does not break into a level above that of Certificate III. At all times the book uses illustrations integrated with the text to explain a topic.

Written to the core practical units of competency from the UEE11 Electrotechnology Training Package, Electrical Trade Practices 2e by Berry, Cahill and Chadwick provides a practical yet comprehensive companion text, covering the practical units within the UEE30811 Certificate III in the Electrotechnology Electrician qualification. Electrical Trade Practices is the practical volume to accompany Phillips, Electrical Principles.

Electrical Trade Principles is a theoretical text that addresses the three key qualifications in the UE11 Electrotechnology Training Package; Certificate II in Electrotechnology (Career Start), Certificate III in Electrotechnology Electrician; and Certificate IV in Electrotechnology – Systems Electrician. The text helps students progress through the course and satisfactorily complete the Capstone Assessment, making them eligible to apply for an electrician 's licence. Premium online teaching and learning tools are available on the MindTap platform. Learn more about the online tools cengage.com.au/learning-solutions

An introductory text for tertiary students studying the measurement of building works.

WELDING AND METAL FABRICATION employs a unique hands-on, project-based learning strategy to teach welding skills effectively and keep students highly motivated. This groundbreaking new text connects each welding technique to a useful and creative take-home project, making exercises both practical and personal for students and avoiding the tedium of traditional, repetitive welding practices. To further enhance the learning process, every welding project includes a set of prints with specifications, like those used in production fabrication shops. This full-featured approach to skill-building reflects the reality of professional welding, where following prints and instructions precisely and laying out, cutting out, and assembling weldment accurately are just as essential as high-quality

welding. The included projects are small to conserve materials during the learning process, but detailed instructions and abundant photos and illustrations guide students through a wide range of fabrication skills. Key steps and techniques within the small projects are also linked to larger projects presented at the end of each chapter, enabling students to apply what they have learned by fabricating and welding something more substantial. This thorough, reader-friendly text also covers relevant academics, such as shop math and measurement, and prepares students for real-world success by having them document their time and materials for each project and prepare a detailed invoice. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Significantly updated in reference to the latest construction standards and evolving building types Many chapters revised including housing, transport, offices, libraries and hotels New chapter on flood-aware design Sustainable design integrated into chapters throughout Over 100,000 copies sold to successive generations of architects and designers - this book belongs in every design studio and architecture school library The Metric Handbook is the major handbook of planning and design information for architects and architecture students. Covering basic design data for all the major building types,
