This camera is designed for serious shooters, not for feature hounds. The EOS-1V gets the job done fast, letting the pro get on to his next paying gig. The EOS-1V is a solid, professional camera made mostly of metal. The EOS 1V is a ruggedized, solid-magnesium-alloy version of the mostly plastic EOS-3, without the EOS 3's mind-controlled autofocus. With this EOS-1V, you have to select your AF zone with the dials, not by just thinking about your subject.

User manual: To a fault, photographers totally hate reading manuals, but unless you have a lot of experience shooting film cameras, download the EOS-1N ' s PDF version from the awesome Butkus camera manual site. There is often too much weird stuff with film cameras to figure out, and there is no reason to make learning about the 1N a woefully miserable experience.
