The NIFTY futures trading strategy is a technical-based strategy. We use the best combination of indicators that can generate accurate trading signals. This futures trading strategy will let you capture the intraday NIFTY trend. We don't reveal anything new here. Actually, this day trading futures strategy was developed by prominent trader Linda Raschke. However, through extensive research, we've found out that the NIFTY futures contract tends to generate more accurate trading signals.

Futures Trading Strategies (By Real Traders) - Trading ...

The number of times you enter into trades each day makes it harder to learn what you need to know about day trading. Choose a Liquid Market in Which to Trade. Many day traders like to use the E-mini S&P 500 market for trading futures. Because the trading in that market is electronic, the E-mini S&P has the advantage of offering transactions that are very fast and liquid. E-mini Nasdaq futures, E-mini Russell futures and Dow futures are some of the other markets, and each market has different ...

3 Practical Futures Trading Strategies still working in ...

An essential component, if you're trading futures, is leverage. This means you don't have to pay for the entirety of the contract when you initiate a trade. Instead, you pay a minimal up-front payment to enter a position. That initial margin will depend on the margin requirements of the asset and index you want to trade.

The Best Futures trading strategies | TRADEPRO Academy

Mean Reversion Futures Trading Strategies The Mean Reversion strategy has gained popularity in the 2000's as an alternative, shorter term, trend following strategy. The Mean Reversion Strategy is trying to enter a market trend on a retracement, then exit the position when the market reverts to a higher level in the trend.

Types of Commodity Futures Trading Strategies - Wisdom Trading

For many futures contracts, trading occurs around the clock. There is increased action when major markets like New York and London open and institutions and traders in the same or nearby time zones begin actively trading. Day traders want volume and movement, and both of these tend to occur as a market open nears. Take the E-mini S&P 500 (ES). The stock market officially opens at 9:30 a.m. Eastern time and the E-mini tracks the Standard & Poor's 500 Index but volume will typically ...
