Crop wild relatives (CWR) are plant species which are more or less closely related to crops. They are a vital resource by providing a pool of genetic variation that can be used in

Download Free Garmin 760

breeding new and

better adapted varieties of crops that are resistant to stress, disease, drought and other factors. They will be increasingly important in allowing crops to adapt to the impacts of climate, thus safeguarding future agricultural production. Until recently, the main

Download Free Garmin 760

Conservation strategy adopted for CWR has been ex situ - through the maintenance of samples as seed or vegetative material in various kinds of genebank or other facilities. Now the need to conserve CWR in their natural surroundings (in situ) is increasingly

Recognized. Recent

research co-

A long-time chief data scientist at Amazon shows how open data can make everyone, not just corporations, richer. Every time we Google something, Facebook someone, Uber somewhere, or even just turn on a light, we create data that

Download Free Garmin 760

Businesses collect

and use to make decisions about us. In many ways this has improved our lives, yet, we as individuals do not benefit from this wealth of data as much as we could.

Moreover, whether it is a bank evaluating our credit worthiness, an insurance company

Download Free Garmin 760

determining our risk level, or a potential employer deciding whether we get a job, it is likely that this data will be used against us rather than for us. In *Data for the People*, Andreas Weigend draws on his years as a consultant for commerce, education,

Download Free Garmin 760

healthcare, travel and finance companies to outline how Big Data can work better for all of us. As of today, how much we benefit from Big Data depends on how closely the interests of big companies align with our own. Too often, outdated standards of control and privacy force us

Download Free Garmin 760

Owners Manual
into unfair contracts with data companies, but it doesn't have to be this way. Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us. Only then can we the people get back more from Big Data than we give it. Big Data is

Download Free Garmin 760

here to stay. Now is
the time to find out
how we can be
empowered by it.
