Make sure your Gibson Les Paul is strung up with your correct gauge of strings and tuned to pitch. Use the correct tools for the job, don't botch it with dodgy spanners and ill-fitting screwdrivers. Find space to work that is quiet and use a steel rule or a feeler gauge to measure the action at the 12th fret.

Jef's Tips for making your Gibson Les Paul play like a ...

For example, on my Gibson Custom Shop R7 Gold Top, I use a Faber locking ABR-1 vintage style bridge and locking studs, whereas on my Gibson SG I use a TonePro setup, as it has a Nashville bridge. Because ABR-1 bridges are the older design, they have less mass and a much smaller contact area with the guitar body and I have just found that the Faber design works better for me and is more stable.
