Experts recommend talking to your baby a lot. "The brain is a pattern-seeking organ," says Jill Stamm, an expert in early brain development and author of the book Bright From the Start. "The more it hears the patterns of language, the easier language learning becomes." Tracy Cutchlow, editor of Brain Rules for Baby, suggests narrating your day.

5 secrets to raising a smart baby | BabyCenter

1. Take a moment to breathe. Instead of focusing on what's bothering you, take some time to focus on only your breathing. Close your eyes, and count to four as you breathe in. Count to four again as you breathe out. Place all your concentration on your breathing rather than your problem. Put your hand on your belly.

Supervise your baby around your cat. Don't put your baby on the floor with the cat and never leave your cat unsupervised with a baby. This includes all cats, even those with an excellent temperament. Using a screen door for the baby's nursery allows you to keep the door shut, but still see and hear the baby.
