Milo Yiannopoulos is not straight, but that's never stopped him from handing out excellent advice. And let's face it, heterosexuals need it. One day, says Milo—if the injunctions in this book are followed—straight people will be able to openly express pride in themselves without fear of judgement or hate, just like everyone else.

"This is a groundbreaking study of the uses of the native in the making of critical theory and national belonging."—Elizabeth A. Povinelli, Professor of Anthropology & Gender Studies, Columbia University --

You study hard. You memorize. You work at a problem over and over until it feels like your head is going to explode. You think, finally I'm ready for the big test. And you still don't make the grade. Relax. The truth is, Dr. Gordon Green knows exactly how you feel. He was a bright student. And he studied hard, too. But he struggled his freshman year at college anyway. What happened? He developed a unique ten-step program based on the simple principle that academic success is not so much a question of how hard you study, but how smart you study. Did it work? After college, Dr. Green went on to earn a Ph.D. in economics at a prestigious university—all the while maintaining straight A's! Thousands of student have benefited from his program. How he has adapted his study methods to apply to you. This is an easy, do-it-yourself guide to help you turn frustration into success. Topics include: How to get the most out of what you need How to budget your time How to take a test Keys to developing effective study habits It's not enough to survive school. This guide will help you excel. And remember: There is no such thing as a mediocre student. Only mediocre results. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Discusses basic study skills and suggests methods for taking notes, writing term papers, and preparing for tests

Be Straight with Me is an unforgettable memoir-in-verse about a love that blurs the boundaries of gender and sexuality—told from the perspective of a young, straight woman who finds herself in a serious relationship with her gay male best friend. With unabashed honesty and piercing emotional clarity, Emily Dalton brings to life this timely, true story about a nonconforming romance and its consequences. During her sophomore year at Middlebury College, Emily meets Max—“you” as she intimately refers to him in the book. Not exactly a tomboy, but not quite a girly girl either, Emily is intent on finding a masculine boyfriend to assuage a deeply rooted fear that she may not be quite feminine enough. Max—a boisterous class clown beloved by his many straight guy friends—has recently come out as gay and is embracing his newly claimed identity. Initially, Max and Emily dislike each other, but end up growing close after a make-out dare on Halloween. Then one night, Max reveals an unexpected physical attraction that catches them both by surprise. The relationship begins, playfully and in secret, and then spirals into something more. Max and Emily’s journey takes many forms—they experiment with drugs; they travel abroad; they try sleeping with other people (together), and everything in between—all in the name of “this bizarre, beautiful thing” they call love.

It's surprising that the term "heterosexuality" is less than 150 years old and that heterosexuality's history has never before been written, given how obsessed we are with it. In *Straight*, independent scholar Hanne Blank delves deep into the contemporary psyche as well as the historical record to chronicle the realm of heterosexual relations—a subject that is anything but straight and narrow. Consider how Catholic monasticism, the reading of novels, the abolition of slavery, leisure time, divorce, and constipation of the bowels have all at some time been labeled enemies of the heterosexual state. With an extensive historical scope and plenty of juicy details and examples, *Straight* provides a fascinating look at the vagaries, schisms, and contradictions of what has so often been perceived as an irreducible fact of nature.
