easily be self taught.

HTML (HyperText Markup Language) is a web programming language designed to create web

documents or web pages. Based upon SGML (Standard Generalized Markup Language), HTML's basic concept

involves the use of "tags".

Professional HTML / CSS Website?

Let's look at some of the basic features of HTML. HTML is made up of tags. Tags are special text that you use to mark up, or distinguish, parts of your web page.

Hence the hypertext "markup" language.

These tags tell the browser to display

Programming
