So Lights Out is both challenging and satisfying, fascinating and horrifying. And important. The core of the horror is our electrical grid. It is no secret that it old, old fashioned, creaky, decrepit and vulnerable to physical attack. Koppel adds that in addition, it is even more vulnerable to cyberattack.

~~Lights Out: A Cyberattack, a Nation Unprepared, Surviving ...~~

Lights Out: A Cyber Attack, a Nation Unprepared, Surviving the Aftermath is a cautionary tale. Ted Koppel's intensely researched book presents a scenario that trumps dystopian novels about zombies and plague--because this threat is real. I've been pondering this review for over a week.

"Ted Koppel reveals that a major cyberattack on America's power grid is not only possible but likely--and that it would be devastating" and "examines a threat unique to our time and evaluates potential ways to prepare for a catastrophe"--Book jacket.

In this New York Times bestselling investigation, Ted Koppel reveals that a major cyberattack on America's power grid is not only possible but likely, that it would be devastating, and that the United States is shockingly unprepared. Imagine a blackout lasting not days, but weeks or months. Tens of millions of people over several states are affected. For those without access to a generator, there is no running water, no sewage, no refrigeration or light. Food and medical supplies are dwindling. Devices we rely on have gone dark. Banks no longer function, looting is widespread, and law and order are being tested as never before. It isn't just a scenario. A well-designed attack on just one of the nation's three electric power grids could cripple much of our infrastructure—and in the age of cyberwarfare, a laptop has become the only necessary weapon. Several nations hostile to the United States could launch such an assault at any time. In fact, as a former chief scientist of the NSA reveals, China and Russia have already penetrated the grid. And a cybersecurity advisor to President Obama believes that independent actors—from "hacktivists" to terrorists—have the capability as well. "It's not a question of if," says Centcom Commander General Lloyd Austin, "it's a question of when." And yet, as Koppel makes clear, the federal government, while well prepared for natural disasters, has no plan for the aftermath of an attack on the power grid. The current Secretary of Homeland Security suggests keeping a battery-powered radio. In the absence of a government plan, some individuals and communities have taken matters into their own hands. Among the nation's estimated three million "preppers," we meet one whose doomsday retreat includes a newly excavated three-acre lake, stocked with fish, and a Wyoming homesteader so self-sufficient that he crafted the thousands of adobe bricks in his house by hand. We also see the unrivaled disaster preparedness of the Mormon church, with its enormous storehouses, high-tech dairies, orchards, and proprietary trucking company - the fruits of a long tradition of anticipating the worst. But how, Koppel asks, will ordinary civilians survive? With urgency and authority, one of our most renowned journalists examines a threat unique to our time

and evaluates potential ways to prepare for a catastrophe that is all but inevitable.

The television journalist reflects on the final year of the twentieth century, discussing the implications of such events as the Clinton impeachment and profiling some of the key figures who made the news.

THE INSTANT NEW YORK TIMES BESTSELLER SHORTLISTED FOR THE FT & MCKINSEY BUSINESS BOOK OF THE YEAR AWARD 2021 'An intricately detailed, deeply sourced and reported history of the origins and growth of the cyberweapons market . . . Hot, propulsive . . . Sets out from the start to scare us out of our complacency' New York Times 'A terrifying exposé' The Times 'Part John le Carré and more parts Michael Crichton . . . Spellbinding' New Yorker Zero day: a software bug that allows a hacker to break in and scamper through the world's computer networks invisibly until discovered. One of the most coveted tools in a spy's arsenal, a zero day has the power to tap into any iPhone, dismantle safety controls at a chemical plant and shut down the power in an entire nation – just ask the Ukraine. Zero days are the blood diamonds of the security trade, pursued by nation states, defense contractors, cybercriminals, and security defenders alike. In this market, governments aren't regulators; they are clients – paying huge sums to hackers willing to turn over gaps in the Internet, and stay silent about them. This Is How They Tell Me the World Ends is cybersecurity reporter Nicole Perlroth's discovery, unpacked. A intrepid journalist unravels an opaque, code-driven market from the outside in – encountering spies, hackers, arms dealers, mercenaries and a few unsung heroes along the way. As the stakes get higher and higher in the rush to push the world's critical infrastructure online, This Is How They Tell Me the World Ends is the urgent and alarming discovery of one of the world's most extreme threats.

Originally published in hardcover in 2019 by Doubleday.

With over 140 countries fielding nation-state and rouge malious cyber hacking capabilities, it is critical that we are aware of threats and vulnerabilities. Adm. Michael Rogers, director of the National Security Agency warned Congress regarding cyber attacks, “It’s only a matter of the ‘when,’ not the ‘if,’ that we are going to see something dramatic.” Cyber Blackout is a warning. It is a chronicle of the cyber threats of which we find ourselves at risk every day. Our power supply is vulnerable. Our food supply. Even the basics of communication. Every facet of our national security is vulnerable to cyber threats, and we are not prepared to defend them all. Cyber Blackout explains how these threats have been building since the Cold War, how they affect us now, and how they are changing the concepts of war and peace as we know them. It is essential knowledge for anyone wishing to understand safety and security in the age of the fifth domain. www.cyberblackout.net

from Nightline News, but he is also the author of Lights Out. In this book Koppel talks about what would happen to the United States if there was ever an attack on the electrical power distribution grid. An attack of this magnitude has never yet happened on American soil but if it did, Koppel wants the public to know what the consequences would be. It has been reported that much of the current electrical power grid has an infrastructure that has not been updated in many years. In addition to this, there is also a serious lack of security in place to make sure that an attack on the electrical distribution system does not take place. Here Is A Preview Of What You'll Learn When You Download Your Copy Today * How The Electric Power Companies Operate* The Reason Why The Electric Power Grid Is A Likely Target For A Terrorist Attack * Learn About What Would Happen To North America In The Event Of A Long Term Power Outage Download Your Copy Today! The contents of this book are easily worth over \$9.99, but for a limited time you can download the summary of Ted Koppel's "Lights Out" by for a special discounted price of only \$2.99

CIA analyst Brynn Taylor developed a new program to combat terrorism, and she invited members of foreign intelligence agencies to America to foster cooperation between countries. Now one of them, Egyptian spy Remon Riad, is missing. Jack Hudson has been working for the Strategic Neutralization and Protection Agency (SNAP) for almost nine years and takes the lead in hunting down the missing spy. But he isn't at all pleased to find out Brynn is involved. It's hard to trust a woman who's already betrayed you. Every lead they follow draws them dangerously deeper into an international plot. Kidnapping, murder, explosions, poisoning--the terrorists will do anything to accomplish their goal of causing a digital blackout that will blind a strategic US military communications center and throw the world into chaos. Can Brynn surrender control to a man who doesn't trust her? And can Jack ever get over what she did to him? The fate of the world--and their hearts--hangs in the balance.

You Need To Read This Book because this will help you dive deeper into the world of Ted Koppel. Emmy and Peabody Award Winner Ted Koppel offers an investigative insight into the threat of a cyberattack on the United States' power grid. Lights Out provides input from national and industry experts, as well as local community members as to our awareness of and preparedness for a uniquely unpredictable form of attack in the Internet age. This summary serves as an accompaniment to Lights Out and offers insights to help you enjoy and understand this book.
