This Excel lesson covers the heavy duty data analysis features of Excel: \* Goal Seek \* Scenario manager \* Solver These features let you tell Excel to run thousands of iterations to find the best answer, whether it be a specific number, the best result (maximum value) or the lower result (minimum value). I go through each feature step-by-step and include many images to make learning the material easy. No technical jargon, just plain English and a few corny jokes thrown in for good measure. As with all my lessons, there is a link inside where you can download follow-along workbooks to practice what you read.

Comprehensive tools and methods to help you build, develop and apply financial models using Microsoft Excel, enabling you to get better, more accurate results, faster. The new edition of this bestselling title begins by explaining basic modelling techniques before moving through to more complex models. The book is divided into two parts: the first part outlines model designs and gives templates, key features and techniques. The second part of the book shows how to build corporate financial models in Excel. This new edition includes a reworking of the book in Excel 2010 (but with older material still included), inclusion of Apple Mac, addition of specific 2010 features and end of chapter exercises. If you are buying the ebook, companion files can be downloaded from the digital downloads section of <http://www.financial-models.com/>.

Napier and Judd train students to become office professionals by bringing their experience as educators and corporate trainers to their latest text on Excel 97.

Fully updated and compliant with Excel 2013, this clearly explains the basic calculations for mathematical finance, backed up with simple templates for further use and development, and a workbook with exercises and solutions at the end of each chapter. The examples used are relevant to both managers and students in the UK and overseas. New to this edition Updated glossary of key terms Functions list in English and Euro languages Continuity check on all formats, layouts and charts More worked examples Additional exercises at the end of each chapter to help build models Templates and models available online.

Expert Paul McFedries helps you master key Excel 2019 and Office 365 tools for building more powerful spreadsheets. Use Excel 2019 and Office 365 core features to build spreadsheets that solve business problems and deliver reliable answers. Drawing on his unsurpassed experience, Paul McFedries helps you make the most of formulas and functions, including the latest improvements to arrays, formula error handling, and statistics. McFedries' step-by-step projects walk you through handling key tasks, from building timesheets to projecting cash flow and aging receivables. His practical examples and clear instructions demystify intermediate- to advanced-level formula construction, and help you leverage Excel's most useful functions in your everyday work. Becoming an Excel expert has never been easier! By reading this book, you will:

- Improve business analyses by adding intelligence and knowledge to your models
- Replace cumbersome formulas with convenient predefined functions
- Radically simplify complex calculations with Office 365's new dynamic arrays
- Use conditional formatting to reveal anomalies, problems, or opportunities
- Calculate loan payments, interest costs, terms, and amortization schedules
- Project the future value of investments, and plan to achieve investment goals
- Master essential discounting and cash-flow analysis tools, including net present value and internal rate of return
- Sort, filter, and analyze tabular data, from customers to inventory
- Easily analyze huge data sets with PivotTable calculations

About This Book

- For everyone who wants to get more done with Microsoft Excel in less time
- For business and financial professionals, entrepreneurs, students, and others who need to efficiently manage and analyze data

Introduces the functions and features of the Microsoft Excel spreadsheet program, shows how to use macros and templates, and discusses customization

Start mastering Excel, the world's most popular and powerful spreadsheet program, with Excel expert Dennis Taylor. Learn how to best enter and organize data, perform calculations with simple functions, work with multiple worksheets, format the appearance of your data and cells, and build charts and PivotTables. Other lessons cover the powerful IF, VLOOKUP, and COUNTIF family of functions; the Goal Seek, Solver, and other data analysis tools; and automating tasks with macros.

Your practical step-by-step guide to planning and building cash valuation models. Through a set of comprehensive instructions and templates it provides the tools to build models that will enable you to carry out accurate and informed analysis of your company's cash liabilities, cash flow and value. If you are buying the ebook, companion files can be downloaded from the digital downloads section of <http://www.financial-models.com/>.
