For the successful application of microbial inoculants in agriculture, the following aspects need to be implemented: (1) to increase the scientific/technological bases of inoculums production and application; (2) to generate specific normative for each inoculants type and its application, either on the seeds or on the soil, or to the plant

Microbes And Microbial

Awareness of the role of microbes and microbial biotechnology in improving the quality of life has been recognized worldwide. Today, what is urgently needed is an exploration of new microbes and novel genes for solving some of the major challenges of the 21st century with particular reference to sustainable
