Electricity ~~overhead power lines~~ What you need to do. The law says that any work near electric overhead power lines must be carefully planned and carried out to avoid danger from accidental contact or close proximity to the lines.. The precautions necessary will depend on the nature of the work at the site and will be required even when work near the line is of short duration.

Construction ~~Overhead power lines industry health & safety~~

This is nuts. Its amazing how close the people in the background get.

Crane hits power line ~~YouTube~~

WARNING: Contact with an overhead power line may cause the power to 'trip out' temporarily and it may be re-energised automatically, without warning. Your local Distribution Network Operator (DNO) can generally supply stickers describing emergency procedures and containing contact numbers that can be stuck in the cabs of vehicles likely to be used near overhead power lines.

If the crane operator is working near a power line that carries 50KV of current, then he should be at least 10 feet away from the lines. In case, the power line is carrying more than 50 kV but less than 350KV, then the crane should be at least 20 feet away from the power line.

How to operate your crane safely near the power lines?

CRANE SAFETY. Case 1: A 28-year old construction worker was holding onto a steel ladder being moved by a telescoping boom crane. As the crane ' s boom was swung in the direction of 7,200 volt power lines, the cable contacted the lines and the worker was electrocuted. Case 2:A co-owner of a steel erection company and three workers were using.

CRANE SAFETY ~~J.E. Spear Consulting~~

Operate cranes at a slower-than-normal rate in power line areas. Use caution when moving over uneven ground that could cause the crane to weave or bob into power lines. Use caution near long spans of overhead power lines, since wind can cause the power lines to sway back and forth and reduce the clearance between the crane and the power line.

Crane Safety ~~Safety Precautions for Working Near ...~~

The machinery or vehicle will become ' live ' at the same voltage as the power lines contacted. The electricity will attempt to pass through the vehicle to the ground. 2. Anything else in contact with the powerlines will also become ' live ' , such as fences and trees. 3.

Safety Controls ~~When Crane Truck Contact With Power Lines~~

The Association of Lorry Loader Manufacturers and Importers (ALLMI) was founded in 1978 at the request of the Health and Safety Executive, and it remains today as the UK ' s only Trade Association devoted exclusively to the lorry loader industry. It serves, represents and promotes the interests of its members and the industry at large, and it is the natural focus and authority on all issues ...
