Modern Livestock & Poultry Production - Frank Flanders ...

For the last 10 years, prior to the coronavirus disease 2019 (Covid-19) pandemic, the main drivers of agricultural growth were the corn (yellow), livestock and poultry sectors. From 2008 to 2018, livestock averaged an annual growth contribution of 13.8 percent to agriculture's gross value added (GVA), poultry 10.9 percent, and corn 5.6 percent.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Animal Agriculture: Sustainability, Challenges and Innovations discusses the land-based production of high-quality protein by livestock and poultry and how it plays an important role in improving human nutrition, growth and health. With exponential growth of the global population and marked rises in meat consumption per capita, demands for animal-source protein are expected to increase 72% between 2013 and 2050. This raises concerns about the sustainability and environmental impacts of animal agriculture. An attractive solution to meeting increasing needs for animal products and mitigating undesirable effects of agricultural practices is to enhance the efficiency of animal growth, reproduction, and lactation. Currently, there is no resource that offers specific knowledge of both animal science and technology, including biotechnology for the sustainability of animal agriculture for the expanding global demand of food in the face of diminishing resources. This book fills that gap, giving readers all the necessary information on important issues facing modern animal agriculture, namely its sustainability, challenges and innovative solutions. Integrates new knowledge in animal breeding, biotechnology, nutrition, reproduction and management Addresses the urgent issue of sustainability in modern animal agriculture Provides practical solutions on how to solve the current and future problems that face animal agriculture worldwide

New to the 9th edition, the Laboratory Manual is a valuable tool designed to enhance your lab experience. Lab activities, objectives, materials lists, step-by-step procedures, illustrations, and review questions are commonly found in a Lab Manual.

Modern Livestock and Poultry Production paints a very vivid picture of the animal agriculture industry and provides the information necessary to pursue a career in the field. Readers will appreciate the industry overview and the detailed discussions of specific species. The author introduces the reader to a variety of major and minor farm animal species, including such topics as breeds, marketing, feeding and management of the species and common diseases and parasites. Beyond discussion of the animals, the book takes a close look at career opportunities and job expectations in the field. Additionally, the reader will find this book useful on a long-term basis as it addresses very specific nutrition needs and feeding requirements of such animals as horses, ponies, goats, sheep, beef cattle, swine, rabbits, hens, ducks and more.

Air Emissions from Animal Feeding Operations: Current Knowledge, Future Needs discusses the need for the U.S. Environmental Protection Agency to implement a new method for estimating the amount of ammonia, nitrous oxide, methane, and other pollutants emitted from livestock and poultry farms, and for determining how these emissions are dispersed in the atmosphere. The committee calls for the EPA and the U.S. Department of Agriculture to establish a joint council to coordinate and oversee short - and long-term research to estimate emissions from animal feeding operations accurately and to develop mitigation strategies. Their recommendation was for the joint council to focus its efforts first on those pollutants that pose the greatest risk to the environment and public health.
