Motorola voice privacy is referred to simply as 'SECURENET', which is a trademarked term that Motorola uses to identify their digital encryption products. There are five different basic encryption protocols, two of which have distinct variations, for a total of eight unique (and non-compatible) encryption protocols.

Motorola Two-Way Encryption Products and Protocols Disclaimer

Save time and resources managing and distributing keys across two-way radio equipment with efficient encryption technology. Two-way radio encryption is a critical aspect of compliance but doesn't have to be tedious or redundant with software and portable solutions that eliminate manual entry, reach out-of-range units and improve security.
