~~The best lenses for Nikon DSLRs: Digital Photography Review~~

Know Nikon mounts before you buy Nikon has cameras with full-frame sensors, and others with APS-C, but the Nikon F mount is the standard for both Nikon DSLR format cameras. You can use an FX lens with both full-frame and APS-C format DSLR cameras, but when you use the FX lens with an APS-C format, you will have to shoot in crop mode and the megapixel count will drop dramatically.

Guide

In most cases the speed of your kit lens—that is, its maximum aperture—will be suitable for average lighting conditions, but if you've worked with your camera and lens combo for a while and often find yourself in low-light situations where you don't want to use flash or a tripod, the AF-S DX NIKKOR 35mm f/1.8G will be a good option. It's a great all-around lens that approximates the angle of view of human vision, and its compact size will be a plus when unobtrusive shooting is called for.
