~~Nikon Sb700 Guide Number—peibe-1.pledgecamp.com~~

Guide number: 25(EVEN)/28 (STD)/30 (CW) (FX-format, ISO 100, m, at 35mm). Maximum guide number: 38 (STD, FX-format, ISO 100, m, at 120mm). Centre-weighted, Even and Standard illumination patterns can be selected to match the shooting situation at hand.

~~Nikon SB-700 AF Speedlight Flash Unit | Wireless Flash Trigger~~

1-1/128 in 1/3 stops, except no steps between full and 1/2 power. If you want 1/3 stops between full and half, set it at MENU > [M]. GN (Guide-number) In this mode, if you tell the SB-700 how far away is your subject, it will calculate and use the correct manual power level for you.

~~Nikon SB-700—Ken Rockwell~~

Flash Level (Guide Number) In flash photography, the light from the flash is used to illuminate the subject. The distance at which a built-in flash can light a subject is however limited. The flash guide number (GN) is a measure of the distance at which the flash can illuminate a subject.

~~Flash Level (Guide Number)—Nikon Imaging Products~~

Guide Number: 197 (60 m) at ISO 100 ... for the flash-head zoomed to 200mm. Guide Number: 118 (36 m) at ISO 100 ... for the flash-head zoomed to 35mm. The GN of 118 is close enough to the Nikon ' s that the explanation is the same for 35mm flash-head zoom. For the flash zoomed to 35mm, the aperture would be 118/10 = f/11.

~~Tutorial: How to use the guide number of your flash—Tangents~~

The Guide Number (GN) is as much about the reflector coverage angle as about the power level. If the GN of one flash is specified as GN 180, but its narrow zoom coverage angle is concentrating all the power to only illuminate a small bright spot on the wall, and another flash specifies GN 90, but its wide reflector is illuminating the entire room, then we don't know much about the difference.
