Hybrid drives and the operation of hybrid vehicles are characteristic of contemporary automotive technology. Together with the electronic driver assistant systems, hybrid technology is of the greatest importance and both cannot be ignored by today's car drivers. This technical reference book provides the reader with a firsthand comprehensive description of significant components of automotive technology. All texts are complemented by numerous detailed illustrations.

Everyone's favourite cars of the 1990s in this lavishly illustrated little book

A woman contemplates suicide as her best friend lies dying. A touching graveside ritual keeps love alive. The cracks in a long-time marriage are revealed when the scotch runs out. A young couple experience the ecstasy and agony of first love. A Month of Sundays shines a light on our most vulnerable moments and finds the grace and dignity within. There is beauty in survival, in knowing we can overcome. We suffer unbearable losses, love the wrong people, and make a mess of our lives, but we go on. Some of the most important moments happen when we are raw and exposed. This collection of a dozen stories explores those dark corners that define us, the emotional spaces we prefer to avoid.

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.
