Manage SOA domains Oracle SOA Suite is currently supported only for non-production use in Docker and Kubernetes. The information provided in this document is a preview for early adopters who wish to experiment with Oracle SOA Suite in Kubernetes before it is supported for production use.

*Manage SOA domains :: WebLogic Kubernetes Operator*

Oracle SOA Suite is a software product under the group – Oracle Fusion Middleware. SOA refers to Service Oriented Architecture useful to develop Enterprise-Level Apps. Many app components will interact with each other using interoperable services of Oracle SOA architecture through a communication protocol over the internet.
