~~History of agriculture - Wikipedia~~

Agriculture on the prehistoric Great Plains describes the agriculture of the Indian peoples of the Great Plains of the United States and southern Canada in the Pre-Columbian era and before extensive contact with European explorers, which in most areas occurred by 1750. The principal crops grown by Indian farmers were maize, beans, and squash, including pumpkins. Sunflowers, goosefoot, tobacco, gourds, and plums, were also grown. Evidence of agriculture is found in all Central Plains complexes. A

Taking root around 12,000 years ago, agriculture triggered such a change in society and the way in which people lived that its development has been dubbed the " Neolithic Revolution." Traditional hunter-gatherer lifestyles, followed by humans since their evolution, were swept aside in favor of permanent settlements and a reliable food supply.

~~The Development of Agriculture | National Geographic Society~~

Agriculture was introduced during this time, which led to more permanent settlements in villages. Finally, during the Neolithic period (roughly 8,000 B.C. to 3,000 B.C.), ancient humans switched...

Agriculture in prehistoric Scotland includes all forms of farm production in the modern boundaries of Scotland before the beginning of the early historic era. Scotland has between a fifth and a sixth of the arable or good pastoral land of England and Wales, mostly in the south and east. Heavy rainfall encouraged the spread of acidic blanket peat bog, which with wind and salt spray, made most of the western islands treeless. Hills, mountains, quicksands and marshes made internal communication and

The agricultural practices of the Native Americans inhabiting the American Southwest, which includes the states of Arizona and New Mexico plus portions of surrounding states and neighboring Mexico, are distinct in numerous ways. Maize was the dominant crop. Introduced from Mesoamerica, it was first cultivated in the Southwest about 2100 BCE. Sedentary cultures based on farming developed afterwards including the Hohokam, Mogollon, Ancestral Puebloans, and Patayan. Due to a deficiency in precipita

Clothing was crucial in human evolution, and having to cope with climate change was as true in prehistory as it is today. In Climate, Clothing, and Agriculture in Prehistory, Ian Gilligan offers the first complete account of the development of clothing as a response to cold exposure during the ice ages.
