Ethiopia Investment and Business Guide Volume 1 Strategic and Practical Information

"Textile Technology" presents a well-written and readable introduction into the field of textile engineering. It is based on an elementary level course focusing on the manufacture (processes and machines) of yarn, fabric, knitwear, nonwovens, braids, reinforcing fabrics, and technical textiles. The book also provides the technicians and engineers in the textile industry with an up-to-date review of processes and equipment for textile manufacturing. The book covers all processing steps for the manufacturing of textiles, describing materials, processes and machines, finishing, making-up, and recycling.

Read Free Project Profile On Spinning Mill Apitco

To provide a better understanding of the individual textile processes, each chapter ends with an example describing the respective processing steps for a specific textile product. In addition, current and future development trends are discussed.

Contents: - Raw Materials - Yarn Production - Fabric Production - Knitwear Production - Nonwovens Production - Braiding Processes and Machines - Production of Two-dimensional Reinforcing Fabrics - Textile Finishing - Processes and Machines for Making-up - Technical Textiles - Disposal and Recycling of Textiles
