HUMALOG SLIDING SCALE INSULIN COVERAGE - SCCG In most sliding-scale insulin therapy regimens, your blood sugar is taken using a glucometer. This is done about four times a day (every 5 to 6 hours, or before meals and at bedtime).

Sliding-Scale Insulin Therapy - Healthline Sliding scale insulin regimens approximate daily insulin requirements. Common sliding scale regimens: Long-acting insulin (glargine/detemir or NPH), once or twice a day with short acting insulin (aspart, glulisine, lispro, Regular) before meals and at bedtime

Sliding Scale Therapy :: Diabetes Education Online SC injection. Initial: 0.2-0.4 units/kg/day SC divided q8hr or more frequently. Maintenance: 0.5-1 unit/kg/day SC divided q8hr or more frequently; in insulin-resistant patients (eg, due to obesity), substantially higher daily insulin may be required. Approximately 50-75% of the total daily insulin requirements are given as intermediate- or long-acting insulin administered in 1-2 injections; rapid- or short-acting insulin should be used before or at mealtimes to satisfy the remainder balance ...

Humulin R, Novolin R (insulin regular human) dosing ... Sliding-scale regular insulin (SSI) in the management of patients with diabetes was the standard practice as early as 1934 (1) and was also used in the hyperglycemic emergency diabetic ketoacidosis (2). These earlier studies used urine glucose for sliding scale, but with demonstration of inaccuracy of urine glucose (3), blood glucose replaced urine glucose for sliding scale in diabetic ...

Sliding-Scale Insulin | Diabetes Care When using long lasting insulin, rather than starting with a static dose every 12 hours as is typically prescribed, TR's approach is to use a three rung sliding scale. When compared to an intermediate action insulin, a tighter dosing scale is used with depot insulin types.

Insulin and Starting Scales, Diabetic Cat Care Insulin is usually injected in the fat under your skin using a syringe, insulin pen or insulin pump tubing. Which insulin is best for you depends on a number of factors. These factors include the type of diabetes you have, how much your blood sugar changes throughout the day and your lifestyle.

Insulin: Compare common options for insulin therapy - Mayo ... 1. Hood RC, Arakaki RF, Wysham C, et al. Two treatment approaches for human regular U-500 insulin in patients with type 2 diabetes not achieving adequate glycemic control on high-dose U-100 insulin therapy with or without oral agents: a randomized, titration-to-target clinical trial. Endocr Pract. 2015;21(7):782-793. Erratum, 2016;22(7):905.

Dosing & Titration | Humulin R U-500 Premixed insulins combine an intermediate-acting insulin or basal insulin analog with a rapid or regular insulin. The ratio of the mixture is indicated in the name. e.g. 70% intermediate or long-acting with 30% rapid or short-acting. If patient is taking this: PREMIXED INSULINS with Regular insulin NPH/Regular (Humulin® 70/30, Novolin®
