have been designed in a way so that you can use them according to their evaluation purposes.

SAP Library – Tools

I'm going to be making "use" of this query often as a template and example of how to quickly and easily setup future Query Manager queries. I know some people like to make things more complex and sort of "merge" the declare statements with the SET statements... but I just find that outright confusing.

There are two tools provided by SAP to help create queries: Query Generator and Query Wizard. In this document we will focus only on Query Generator, as it provides greater flexibility and produces queries in fewer steps. You can access the Query Generator by going to Tools > Queries > Query Generator.
