As expressed by George Mead in Mind, Self and Society, symbolic interactionism suggests that the self is defined by the way that society responds to the individual. This idea helped shape the central ideas put forth in the book Symbolic Self-Completion , which states that individuals tend to define themselves using symbols of accomplishment and that they use symbols to communicate their self-definitions to society. Nicki Lisa Cole, Ph.D. Updated October 06, 2019. Symbolic interaction theory, or symbolic interactionism, is one of the most important perspectives in the field of sociology, providing a key theoretical foundation for much of the research conducted by sociologists. The central principle of the interactionist perspective is that the meaning we derive from and attribute to the world around us is a social construction produced by everyday social interaction.

The tendency to present a positive self-image to others, with the goal of increasing our social status, is known as self-presentation, and it is a basic and natural part of everyday life. A big question in relation to self-presentation is the extent to which it is an honest versus more strategic, potentially dishonest enterprise.

2. According to Cooley, that persons make society would be generally admitted as a matter of course, but that society makes persons would strike many as a startling notion, though I know of no good reason for looking upon the distributive aspect of life as more primary or causative than the collective aspect.

Symbolic interaction theory analyzes society by addressing the subjective meanings that people impose on objects, events, and behaviors. Subjective meanings are given primacy because it is believed that people behave based on what they believe and not just on what is objectively true. Thus, society is thought to be socially constructed through human interpretation.

George Herbert Mead is widely recognized as one of the most brilliantly original American pragmatists. Although he had a profound influence on the development of social philosophy, he published no books in his lifetime. This makes the lectures collected in *Mind, Self, and Society* all the more remarkable, as they offer a rare synthesis of his ideas. This collection gets to the heart of Mead's meditations on social psychology and social philosophy. Its penetrating, conversational tone transports the reader directly into Mead's classroom as he teases out the genesis of the self and the nature of the mind. The book captures his wry humor and shrewd reasoning, showing a man comfortable quoting Aristotle alongside Alice in Wonderland. Included in this edition are an insightful foreword from leading Mead scholar Hans Joas, a revealing set of textual notes by Dan Huebner that detail the text's origins, and a comprehensive bibliography of Mead's other published writings. While Mead's lectures inspired hundreds of students, much of his brilliance has been lost to time. This new edition ensures that Mead's ideas will carry on, inspiring a new generation of thinkers.

In a future world, only one man dares to think, strive, and love as an individual in the midst of a paralyzing collective humanity.
