locate your septic system

*Septic System Owner's Guide
- Florida Department of
Health*

A septic system is the most common method of sewage treatment for homes and businesses that are not connected to an area wide sewage system. In its basic form, a septic system consists of a septic tank, where solids settle and decompose, and a drainfield where liquid discharged from the tank is treated by bacteria in the soil. More complex septic systems are installed in areas with high groundwater and/or poor soils.

Onsite Sewage System Owner Responsibilities Owning a home served by an onsite sewage (septic) system comes with certain owner responsibilities. Most of these are common sense and in keeping with the maintenance of other household systems such as electrical, heating and cooling components, appliances, roofs, and so forth.
