Service Guides Pressure Washers

A pressure washer applies pressure (naturally) to water which is then expelled at force from a hose or cleaning lance. Pressure, however, is not the only factor in determining the cleaning efficiency of a pressure washer as the water flow rate also plays a significant part and it is the balance between the two which determines which machine and what settings to use.

Best pressure washers - the best pressure washer you can buy

Here's all you need to know about the technical features of a pressure washer. How does a pressure washer work? Pressure washers connect up to your garden hose and use electricity to power a pump system, which then accelerates the water at a high pressure. Despite being a lot more powerful, they actually use less water than your hose, making them incredibly efficient. Power – A pressure washer's power is measured in watts. More watts equal more power.
