The manual, prepared by David Mills, professor emeritus at the College of the Redwoods in California, provides solutions for selected odd-numbered end-of-chapter problems in the textbook and uses the same side-by-side format and level of detail as the Examples in the text.

These solutions manuals contain detailed solutions to more than half of the odd-numbered end-of-chapter problems from the textbook. Following the problem-solving strategy presented in the text, thorough solutions are provided to carefully illustrate both the qualitative and quantitative steps in the problem-solving process.

This solutions manual for students provides answers to approximately 25 per cent of the text's end-of-chapter physics problems, in the same format and with the same level of detail as the worked examples in the textbook.

The perfect way to prepare for exams, build problem-solving skills, and get the grade you want! For Chapters 1-22, this manual contains detailed solutions to approximately 20% of the problems per chapter (indicated in the textbook with boxed problem numbers). The manual also features a skills section, important notes from key sections of the text, and a list of important equations and concepts.
