This book analyses the implementation of global pharmaceutical impact standards in the European risk regulation framework for pharmaceuticals and questions its legitimacy. Global standards increasingly shape the risk regulation law and policy in the European Union and the area of pharmaceuticals is no exception to this tendency. As this book shows, global pharmaceutical standards set by the International Council for Harmonisation of Technical Requirements for the Registration of Pharmaceuticals for Human Use (ICH), after they are adopted through the European Medicines Agency (EMA), are an important feature of the regulatory framework for pharmaceuticals in the EU. In addition to analysing the influence of these global standards in the EU legal and policy framework, the book questions the legitimacy of the Union's reliance on global standards in terms of core administrative law principles of participation, transparency and independence of expertise. It also critically examines the accountability of the European Commission and the European Medicines Agency as participants in the global standard-setting and main implementation gateway of the global pharmaceutical standards into the European Union.

This book analytically reviews the impact of the global anti-money laundering and counter-terrorist financing (AML/CFT) framework on the compliance trajectory of a number of jurisdictions to this framework. The work begins by examining the international financial sector reform and its evolution to inculcate the global framework for AML/CFT regulations. It challenges the resulting uniform AML/CFT due to its paradoxical impact on the compliance trajectory of African countries and emerging economies (ACs/EEs). This is done through an examination of the pre-conditions for effective regulation and compliance drivers for ACs/EEs that reveals the behavioural impact of the AML/CFT standards on the bloc of countries. Through the application of agency theory, it explores the relationship between ACs/EEs on the one hand and the international financial institutions that formulate, disseminate and facilitate compliance with the global framework for AML/CFT standards on the other. The remaining chapters review empirically the compliance pressures and resulting compliance trajectory of ACs/EEs with the AML/CFT standards. The final part of the book provides a detailed explanation of the compliance challenges of ACs/EEs and the legitimacy concerns that facilitate this. This book offers a new direction on the impact of global AML/CFT standards on ACs/EEs and contributes to the understanding of the conditions under which the global standards are likely to facilitate proactive compliance within these blocs of countries. As such it will be a valuable resource for academics, researchers and policy-makers working in this area.

This volume gathers together sixteen seminal articles, all written by leading scholars, which articulate and effectuate the influence of Derrida's scholarship on the field of law. The articles included in this collection are underpinned by the authors' shared belief that the intellectual challenges posed by Derrida's work to legal scholarship are as challenging as they are pressing and as profound as they are inescapable. In addition to a thorough introduction addressing salient aspects of Jacques Derrida's engagement with law, this book comes with an extensive bibliography of sources in English. This provides the reader with a carefully selected list of more than one hundred texts, all of which serve as introductory pathways to Derrida's philosophy and in particular to the interaction between Derrida and law. A fine reminder of the trans-disciplinary influence of Jacques Derrida's thought, this landmark collection is destined to generate substantial interest in philosophy departments and law schools alike.

Legal transplantation and reform in the name of globalisation is central to the transformation of Asian legal systems. The contributions to "Examining Practice, Interrogating Theory: Comparative Legal Studies in Asia" analyse particular legal changes in China, Indonesia, Malaysia, Singapore, Thailand, Taiwan, and Vietnam. The contributions also concurrently critically analyse the utility of scholarly developments in comparative legal studies, particularly discourse analysis; regulatory theory; legal pluralism; and socio-legal approaches, in the study of Asian legal systems. While these approaches are regularly invoked in the study of transforming European legal systems, the debate of their relevance and explanatory capacity beyond the European context is recent. By bringing together these diverse analytical tools and enabling a comparison of their insights through Asian empirical case studies, this book makes an invaluable contribution to the debates concerning legal change and the methods by which it is analysed globally, and within Asia.

Includes history of bills and resolutions.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Now in its 28th year, the Yearbook of European Law is one of the most highly respected periodicals in the field. Featuring extended essays from leading scholars and practitioners, the Yearbook has become essential reading for all involved in European legal research and practice. This year's issue includes a special symposium on the recent Kadi case in the European Court of Justice, with contributions by Giorgio Gaja, Christian Tomuschat, Enzo Cannizzaro, Riccardo Pavoni and Martin Scheinin.

Listing by companies from one country on the stock market of another country is a device often used both to raise capital in, and to increase bonding with, the target country. This book examines the listing by Chinese companies on the Hong Kong stock market. It discusses the extent of the phenomenon, compares the two different regulatory regimes, and explores the motivations for the cross-listing. It argues that a key factor, in addition to raising capital and bonding with the Hong Kong market, is Chinese companies' desire to encourage legal and regulatory reforms along Hong Kong lines in mainland

China, in order to develop and open up China's domestic capital markets.

The new edition of this highly acclaimed book gives a comprehensive update and analysis of European law as it affects competition in EU energy markets. It incorporates the numerous changes since the 2011 edition, including an entirely reworked section on anti-competitive agreements and practices, an update of all new merger decisions, as well as abuse of dominance. Furthermore, the book offers a detailed update and explanation of the major developments on state aid, with the publication of new Guidelines applicable inter alia to renewable energy support schemes, introducing major reform and key decisions, such as the one on the UK Hinkley Point nuclear reactor. [Subject: EU Law, Energy Law, Competition Law]
