Test strips for chlorine sanitizers are strips of paper specifically designed for testing chlorine concentrations only. Dip a strip into the solution and immediately remove.

# Download Ebook Test For Chlorine Litmus Paper

A color develops on the strip. The color on the strip is then compared to a color chart to establish the concentration level. Most chlorine test strips measure concentrations between 10 – 200 parts per million.

HCl turns the litmus red - it doesn't bleach it red. The word 'bleach' is used to show that the colour is being lost, i.e. it is turning white. HOCl is the bleach in the reaction. The reason why it bleaches organic matter probably is due to loss of conjugation because of addition reactions occurring when the H-OCl meets a double
