Net income for the third quarter of 2019 included a one-time tax benefit of \$65.8 million related to the release of our valuation allowance. Adjusted net income was \$17.7 million for the third quarter of 2020, compared to \$17.0 million.

Financial Soundness Indicators (FSIs)

Financial soundness indicators (FSIs) are methodological tools that help quantify and qualify the soundness and vulnerabilities of financial systems according to five areas of interests: capital adequacy, asset quality, earnings, liquidity, and sensitivity to market risk. With support from the Investment Climate Facilitation Fund under the Regional Cooperation and Integration Financing Facility, this report describes the development of FSIs for Viet Nam and analyzes the stability and soundness of the Vietnamese banking system by using these indicators. The key challenges to comprehensively implementing reforms and convincingly addressing the root causes of the banking sector problems include (i) assessing banks' recapitalization needs, (ii) revising classification criteria to guide resolution options, (iii) recapitalization and restructuring that may include foreign partnerships, (iv) strengthening the Vietnam Asset Management Company, (v) developing additional options to deal with nonperforming loans, (vi) tightening supervision to ensure a sound lending practice, (vii) revamping the architecture and procedures for crisis management, and (viii) strengthening financial safety nets during the reform process.

Internal Security and the Challenges of Internal Security Management

Internal Security and the Challenges of Internal Security Management

This book explores the disturbing dimensions of the problem of insecurity in Nigeria, such as herdsmen violence, the Boko Haram insurgency, cybercrime, militancy in the Niger Delta, communal conflict and violence, as well as police corruption. It offers a comprehensive discussion of the theoretical foundations of internal security, the threats to internal security, the role of formal and informal agencies in internal security management and the challenges of internal security management.

Countries around the world are increasingly relying on individual pension savings accounts to provide income in old age for their citizens. Although these funds have now been in place for several decades, their performance is usually measured using methods that are not meaningful in relation to this long-term objective. The recent global financial crisis has highlighted the need to develop better performance evaluation methods that are consistent with the retirement income objective of pension funds. Compiling research derived from a partnership among the World Bank, the Organisation for Economic Co-operation and Development (OECD), and three private partners, 'Evaluating the Financial Performance of Pension Funds' discusses the theoretical basis and key implementation issues related to the design of performance benchmarks based on life-cycle savings and investment principles. The book begins with an evaluation of the financial performance of funded pension systems using the standard mean variance framework. It then provides a discussion of the limitations inherent to applying these methods to pension funds and outlines the many other issues that should be addressed in developing more useful and meaningful performance measures through the formulation of pension-specific benchmark portfolios. Practical implementation issues are addressed through empirical examples of how such benchmarks could be developed. The book concludes with commentary and observations from several noted pension experts about the need for a new approach to performance measurement and the impact of the recent global financial crisis on pension funds.

This Financial Sector Stability Assessment on Nigeria discusses the macroeconomic performance and structure of the financial system. Although Nigerian economy experienced both domestic and external shocks in recent years, the economy continued to grow rapidly, achieving more than 7 percent growth each year since 2009. The performance of financial institutions has begun to improve, though some of the emergency anti-crisis measures continue to be in place. However, the regulatory and supervisory framework has gaps and weaknesses. In sum, the Nigerian economy has emerged from the banking crisis, and has the potential to enjoy an extended period of strong economic growth.

In its fourth edition, this report focuses on recent developments in Africa's banking sectors and the policy options for all stakeholders. The study of banking sectors across all African sub-regions includes the results of the EIB survey of banking groups operating in Africa. Three thematic chapters address challenges and opportunities for financing investment in Africa: Crowding out of private sector lending by public debt issuance The state of bank recovery and resolution laws in Africa Policy options on how to finance infrastructure development. The report finds that in many African banking markets, the last two years saw a pause in financial deepening. However, a rising share of banking groups report improving market conditions and plan a structural expansion of their operations in Africa and a continued push for new technologies.

India is ageing. One response of Indian policy makers has been introduction of the New Pension Scheme (NPS), a defined contribution pension scheme which is mandatory for civil servants and voluntary for the rest of the population. Given the size of the target population, even if take-up is modest, NPS savings may soon provide huge amounts of capital to India's economy. However, challenges are abound. What governance structure will best achieve the ultimate policy goal of serving the needs of savers? What business processes and information technology design will serve members best? How effectively will the NPS attack the problem of old-age poverty? In this book, a multi-disciplinary international team, comprising of economists, lawyers, pension management experts, and capital market experts, explore these and other questions. The book proposes significant legal, regulatory, and governance reforms for the NPS and other existing pension schemes, as well. It finds that current NPS business practices cannot keep pace with potential growth of the system and makes suggestions on how to take better advantage of information technology. Based on review of experience elsewhere and state-of-the-art economic-demographic modelling, it warns that the NPS in its current form does not address the retirement income needs of the lifelong very poor, suggesting that it is only one in a range of responses needed to cope with the challenges of population ageing in India.

On the eve of battle, passions are running high... "A brilliant achievement...vivid, accurate, dramatic...the description of Waterloo is magnificent."-DAILY MAIL "My favorite historical novelist."-MARGARET DRABBLE IN THE SUMMER OF 1815, with Napoleon Bonaparte marching down from the north, Brussels is a whirlwind of parties, balls and soirees. In the swirling social scene surrounding the Duke of Wellington and his noble aides de camp, no one attracts more attention than the beautiful, outrageous young widow Lady Barbara Child. On their first meeting, dashing Colonel Charles Audley proposes to her, but even their betrothal doesn't calm her wild behavior. Finally, with the Battle of Waterloo raging just miles away, civilians fleeing and the wounded pouring back into the town, Lady Barbara discovers where her heart really lies, and like a true noblewoman, she rises to the occasion, and to the demands of love, life and war... "Wonderful characters, elegant, witty writing, perfect period detail, and rapturously romantic. Georgette Heyer achieves what the rest of us only aspire to." -KATIE FFORDE

WINNER of the BISA IPEG Book Prize 2015 http://www.bisa-ipeg.org/ipeg-book-prize-2015-winner-announced/ Under the rubric of ‘financial inclusion’, lending to the poor –in both the global North and global South –has become a highly lucrative and rapidly expanding industry since the 1990s. A key inquiry of this book is what is ‘the financial’ in which the poor are asked to join. Instead of embracing the mainstream position that financial inclusion is a natural, inevitable and mutually beneficial arrangement, Debtfare States and the Poverty Industry suggests that the structural violence inherent to neoliberalism and credit-led accumulation have created and normalized a reality in which the working poor can no longer afford to live without expensive credit. The book further transcends economic treatments of credit and debt by revealing how the poverty industry is extricably linked to the social power of money, the paradoxes in credit-led accumulation, and ‘debtfarism’. The latter refers to rhetorical and regulatory forms of governance that mediate and facilitate the expansion of the poverty industry and the reliance of the poor on credit to augment/replace their wages. Through a historically grounded analysis, the author examines various dimensions of the poverty industry ranging from the credit card, payday loan, and student loan industries in the United States to micro-lending and low-income housing finance industries in Mexico. Providing a much-needed theorization of the politics of debt, Debtfare States and the Poverty Industry has wider implications of the increasing dependence of the poor on consumer credit across the globe, this book will be of very strong interest to students and scholars of Global Political Economy, Finance, Development Studies, Geography, Law, History, and Sociology. https://www.youtube.com/watch?v=2lU6PHjyOzU

Since the late 1980’s, many OECD governments have invested heavily in improving the quality of their debt management practices. In recent years, the topic has received additional attention for its potential role in reducing the vulnerability of emerging economies to financial and economic shocks. A government asset and liability management framework can offer valuable conceptual insights for managing the risks associated with government debt portfolios and their interface with a wide range of public policy issues. Prudent risk management requires clear objectives or debt managers, sound institutional and legal framework, appropriate quality assurance procedures and checks and balances, and efficient management information systems. This report draws from the experiences of leading countries in this field.
