Step 1, Place the saddle pad on the horses back. Putting a saddle pad on the horses back prevents the leather from rubbing the horse. Make sure the front is near the end of the withers.Step 2, Place the saddle on your horse's back. Make sure that your horse is secure in cross-ties or being held by a helper throughout the process. Place the saddle directly on their back , making sure that it does not block the front shoulder or extends beyond the last rib in their ribcage.Step 3, Check the ...

How to Fit a Western Saddle: 9 Steps (with Pictures) - wikiHow
It's best that you take a step back and take a close look at your horse while he is saddled to determine fit. Your saddle fits just right if it sits level on your horse's back and the bars of the tree do not pinch. The front of your saddle should be positioned behind your horse's shoulder blade, allowing him freedom of movement. Your saddle is too narrow if the front of the saddle sits high. When the saddle is sitting directly upon the horse's withers, pinching can often occur.

Western Saddle Fitting 101: Tips on Proper Fit, Selecting ...
If the saddle is not level, try adjusting it by using shims, sliding it forward or back to raise or lower the front, or trying different rigging positions. When all else fails, you may need a different saddle with a better fit. If the front of the saddle is high, the tree may be too narrow. If the front of the saddle is low, the tree may be too wide.

Measuring And Fitting A Western Saddle - Horse.com
Rules you should follow: Let's begin with understanding general rules of western saddle fitting for the rider: The size of seat refers to the rider and it has nothing to do with how that saddle fits for the horse. It is important to have about 4" gap between the fork and front of your body. The ...

How to fit a western saddle to a rider?
Full Bar Contact - Western SaddlesThe bars should touch the horse's back evenly from front to back; some panels may be designed off the back end to allow the back to come up during engagement. Read More

Watch this video to learn if your Western Saddle fits your horse correctly

Western Saddle Fit Video - YouTube
Use your fingers to check a western saddle for proper fit. Test the fit of a western saddle by sitting on it as you would for riding on either a saw-horse or your horse. A well-fitting saddle will allow 3 to 4 fingers to fit between the fork/swell and your thigh. If you can fit more than 4 fingers, the saddle is too large.

How to Fit a Saddle: 15 Steps (with Pictures) - wikiHow
Super comfortable for the rider, but also wonderfully comfortable for the horse too - thanks to the custom tree making service offered by EQUIScan. a true fit to your horses back shape via a high-tech templating system, which then custom makes a tree for your horses' exact shape. These saddles can also be made with extra wood on the underside, so if your horse should grow substantially, then the clever guys who make the TWS Custom Saddles can file some of the underside of the tree away and ...

The Western Saddler Ltd.
Fitting The Rider: This way of fitting the rider is specific to our saddles. Most other western saddles have a built up seat in the front and often require a larger seat size. We discourage oversized seats to keep you as far forward on the horse as possible, but still be comfortable and properly aligned for the type of riding you do.

Saddle Fit How-To Guide - Out West Saddlery
Traditionally, Western saddles have focused more on fitting the rider, since only limited fitting to the horse could be done. The quarter bars, semi-quarter bars, or Arab bars were basically the only changeable options needed in the past. The horses used for Western disciplines were usually Quarter Horses, which were kept relatively pure in ...

Saddle Fit - English vs. Western | Horse Journals
While the principles of saddle fit are common between all saddles, how they actually apply varies between different types of saddles. There is very little information about how western saddles should fit and function originating from people whose background and experience is primarily with western saddles. Coming from Rod and Denise Nikkel, experienced and well respected western saddle tree makers, Western Saddle Fit - The Basics will answer that question.

Western Saddle Fit
Western saddles To make sure that a western saddle fits correctly, follow these steps: 1. Place the saddle on the horse's back with a one-inch thick (or so) saddle pad underneath it.

Fitting a Saddle to Your Horse - dummies
First, start with some general rules of thumb for proper western saddle seat size for the rider: Keep in mind that Western saddle seat size refers to rider fit and has nothing to do with how the saddle fits the horse. There should be approximately four inches between the front of your body and the ...

What Western Saddle Seat Size Do I Need?
This is the ONLY one of the fourteen essential aspects to correct saddle fit, that Adjustable Gullet Saddles (which is a misnomer, as none of them can adjust the gullet width at all!) address. People also wrongly assume that if you can get 3 fingers wither clearance, with the rider on board, then the saddle fits at the withers.

Saddle Fitting Guide - Horse - Rider
To make sure the saddle fits, first place it on your horse's back with no pad. There should be enough room to fit two to three fingers between the top of the wither and the gullet on the saddle. The saddle should also be sitting level on your horse's back.

7 Most Comfortable Western Saddles for Trail Riding ...
A whole lot of behavior problems, back and shoulder injuries are due to poor saddle fit. I recommend, ride and school with an English saddle because there are so many different trees available. Western saddle makers have a long ways to go in order to catch up.
